### Future Innovations and Techniques: Endoscopic Hemostasis ...

<https://www.sciencedirect.com/science/article/pii/S1096288305000379>

Future developments and **innovations** in the field of endoscopic hemostasis for upper gastrointestinal **bleeding** need to be based on an understanding of the efficacy and limitations of current methods and on an understanding of the vascular pathology of **bleeding** abnormalities.

### Management of non-variceal upper gastrointestinal bleeding ...

<https://fg.bmj.com/content/10/1/35> ▾

Jan 01, 2019 · Acute upper gastrointestinal **bleeding** (AUGIB) is one of the most common medical emergencies in the UK. Despite advancement in **technology** the management of AUGIB remains a challenge. The clinical community recognise the need for improvement in the treatment of these patients. AUGIB has a significant impact on resources. Endoscopic therapy is the gold standard treatment.

**Potential role of new technological innovations in non-variceal hemorrhage**

Friedel D. Potential role of new technological innovations

David Friedel

**Abstract**

The present armamentarium of endoscopic hemostatic therapy for non-variceal upper gastrointestinal hemorrhage includes injection, electrocautery and clips. There are newer endoscopic options such as hemostatic sprays, endoscopic suturing and modifications of

### Potential Role of Narrow Band Imaging (NBI) and Magnifying ...

[https://www.giejournal.org/article/S0016-5107\(07\)00681-5/abstract](https://www.giejournal.org/article/S0016-5107(07)00681-5/abstract)

This study aims to determine whether the latest narrow banding imaging (NBI) **technology** may improve the diagnostic accuracy for such a condition. Methods: Surveillance endoscopy was performed on 28 patients with known IM using a magnifying (80x) endoscope of the Olympus Evis-Lucera-260 system (Tokyo, Japan) incorporated with NBI function.
