

## Answering Reviewers

**1.It would be better if authors provide a comprehensive table consisting those 5 cases and the differences.**

Answer: We have added a comprehensive table according to your request.

Please see the highlighted yellow section, Table1, Line 607, Page29 to 30.

**2.In the abstract authors mentioned the quality of life of the patient was significantly improved and the survival was prolonged while there is no criteria/definition or statistic test about the quality of life / prolonged survival were mentioned.**

Answer: Thank you for your comments. We agree with you , and we have changed it as follows:

“It may provide an option for the treatment of patients with advanced hepatic malignancies.”

Please see the highlighted yellow section on Line 90 to 92, Page 5.

**3.In the abstract’s conclusion, author mentioned cryoablation combined with IMRT is a safe and effective treatment for hepatic malignancies.**

**This conclusion is too far because no statistics finding and this study has only 5 case studies and 2 of them were death.**

**Answer: Thank you for your comments. We accept your suggestion and modify it as follows:**

**“Our clinical practice demonstrated that cryoablation combined with IMRT could be implemented safely. The definitive efficacy for hepatic malignancies needs to be confirmed in larger-size sample prospective studies.”**

**Please see the highlighted yellow section on Line 108 to 111, Page 6.**

**4.Please provide a structured description for each case**

**We provide a structured description for each case according to the editor’s request.**

**Please see the highlighted yellow section from Line 311 to 588, Page 15 to 28, and Line 700 to 704,Page 34 to 35.**
