Identification of candidate biomarkers with cancer ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4932840>

The glycosylated candidate markers and nonglycosylated candidate markers identified with tumor-specific lectin affinity are promising for the detection and potential therapeutic intervention of endometrioid ovarian cancer and possibly other forms of ovarian cancer.

Identification of candidate target genes for endometrial ...

<https://www.spandidos-publications.com/etm/17/1/298>

The aim of the present study was to implement a weighted gene co-expression network analysis to screen genes that were significantly correlated with the clinical phenotype of endometrial cancer based on data from The Cancer Genome Atlas.

Basic Study

Identification of candidate biomarkers correlated with pathogenesis of postoperative peritoneal adhesion by using microarray analysis

Yao-Yao Bian, Li-Li Yang, Yan Yan, Min Zhao, Yan-Qi Chen, Ya-Qi Zhou, Zixin Wang, Wen-Lin Li, Li Zeng

Abstract

BACKGROUND

Postoperative peritoneal adhesion (PPA) characterized with abdominal pain,
