SPECIFIC COMMENTS TO AUTHORS

It is a pleasure to review the manuscript by Blank and colleagues who reported a single-institution retrospective analysis of cancer patients seeking medical help from an orthopedic oncology clinic at a tertiary center. Seventeen percent of the target population agreed to enter the Press Ganey® patient surveys. The novelty of this research is that there are very few studies investigating via the patient satisfaction survey for this subgroup of orthopedic oncology outpatients. The limitations of the research were well discussed. There are some minor points that the authors can improve the manuscript: #1. The Press Ganey survey was too briefly introduced in the Methods section. For example, a reader cannot find any information about 'How many items needed to answer?', the range of completion time for a survey, etc. #2. The published paper (Ref. Sarcoma. 2019 Jan 16;2019:9725976.) by Wilke et al., entitled, 'An Evaluation of PROMIS Health Domains in Sarcoma Patients Compared to the United States Population.' should be cited in your Discussion.
