Ruo-Yu Ma,
Science Editor,
World Journal of Gastrointestinal Pathophysiology.

Dear Dr. Ma,

Revised Manuscript Submission – 49602

Thank you very much for inviting us to submit a revised manuscript. We value the reviewer's comments and have revised the manuscript accordingly.

Please find uploaded the revised manuscript titled "Neutropenic Enterocolitis: A Clinico-pathological Review".

We have listed below the reviewer's comments followed by our answers.

Reviewer #1

The authors made a good review about neutropenic enterocolitis.

Answer: Thank you for reviewing this manuscript and the positive comment.

Reviewer #2

The Authors reviewed the neutropenic enterocolitis (NE), which is also known as typhlitis, typhlenteritis, ileocecal syndrome, or cecitis. This is valuable study that is rarely seen in patients with neutropenia or immun deficiency. The Authors exhibited an important topic as detailed format with subtitles such as Clinical Characteristics/Imaging, Pathologic Findings, Pathogenesis/Pathophysiology, Differential Diagnosis, and Treatment Considerations. There are some punctuation errors as "...for the diagnosis of NE[19]. However...", after correction of these ones, this study is acceptable for publication.

Answer: Thank you for reviewing this manuscript and the positive comment. We have corrected all the errors.
