

Biostatistics Review Certificate

Dear Editor,

The manuscript "CARMA3/NF-KB signaling contributes to the tumorigenesis of hepatocellular carcinoma and is inhibited by Sodium aescinate" has been reviewed by a biostatistics editor. We fortunately invited Dr.Long Ma, an assistant research of Medical Statistical Institute in Anhui Medical University to review our manuscript and give suggestions to our statistical methods under reviewing. We must thank to his generous help.

His contact Email is: longma_aum@163.com.

Prof.Xiaoping Geng.
