Impact of dental clearance on total joint arthroplasty, a systematic review

Frey C *et al.* Impact of dental clearance on arthroplasty

### Abstract

Many orthopedic surgeons require that their patients obtain dental clearance before elective total joint arthroplasty (TJA). However, there is no consensus substantiating the practice. To this end, a systematic review on the prevalence of dental pathology in TJA patients, risk factors for failing dental screening, and impact of dental evaluations was performed. Literature was sourced from PubMed and Scopus databases. Six papers were
