

**Dear Editors and Reviewers:**

Name of Journal: *World Journal of Clinical Cases*

Manuscript NO: 50156

Manuscript Type: Case report

Thank you for your letter and for the reviewers' comments concerning our manuscript entitled Primary hypoparathyroidism accompanied by rhabdomyolysis induced by infection: A case report. Those comments are all valuable and very helpful for revising and improving our manuscript, as well as the important guiding significance to our researches. We have studied comments carefully and have made correction which we hope meet with approval. The main corrections in the paper and the responds to the reviewer's comments are as following:

1. Please provide the decomposable figure of all the figures, whose parts are all movable and editable, organize them into a PowerPoint file, and submit as "Manuscript No. - image files.ppt" on the system. Make sure that the layers in the PPT file are fully editable. For figures, use distinct colors with comparable visibility and consider colorblind individuals by avoiding the use of red and green for contrast.

**Response:** It is our negligence and we are sorry about this. According to comment, we provided the decomposable figure of all the figures, whose parts are all movable and editable, organize them into a PowerPoint file, and submit as "Manuscript No. - image files.ppt", in which the layers in the PPT file are fully editable.

2. General organisation is good. The authors discussed extensively primary hypoparathyroidism, hypocalcemia and mentioned the main causes of rhabdomyolysis. I advice them to expand discussion of rhabdomyolysis for instance the following article may be added to the reference list.

(Rhabdomyolysis, compartment syndrome and thermal injury)

**Response:** We appreciate the reviewer's positive evaluation of our work. According to the comment, we perfected the description of rhabdomyolysis and added article which was recommend by the peer-reviewers to the reference list.

3. In order to attract readers to read your full-text article, we request that the author make an audio file describing your final core tip.

**Response:** As the edit's good advice, we added audio file describing our final core tip.

4. Please check and confirm that there are no repeated references! Please add PubMed citation numbers and DOI citation to the reference list and list all authors. Please revise throughout. The author should provide the first page of the paper without PMID and DOI.

**Response:** We deeply appreciate the reviewer's suggestion. We have checked and confirmed that there are no repeated references, and we checked the PMID and DOI of all references. But the DOI of two references(No.17 and No.26) was nowhere to find, and we provided the first page of the article. Special thanks to you for your good comments. We shall look forward to

hearing from you at your earliest convenience.

Yours sincerely.
