this case is interesting, but some comments are mentioned below: 1- what is the role of EUS in the diagnosis and treatment of this case. 2- what about the option of ESD for gastric tumor and robot laproscopy for removal of targeted lymph nodes. 3- as regards figures, it is important to mention ,type of figure, magnifications, annotations, arrows that point to specific lesions, type of staining and its color significance. 4- some comments in the uploaded file.
