SPECIFIC COMMENTS TO AUTHORS

In this paper, the authors presented a rare variant of apncreatic tumor, which is difficult to be diagnosed and treated. the apper is valuable but some points need to be adressed: 1. Typing of manuscript, including references list, should respect the Basihideng criteria. 2. Case presentation - the authors mentioned that the serum parameters were in normal limits. It is necessary mentioning the exact values and the normal ranges used for data interpretation. 3. Case presentation- physical exam - in two consecutive phrases thea uthors mentioned "CT scan revealed"...please rephrase. 4. Case presentation - as the neuroendocrine component was recently to associate HER-2 positivity in cystic lesions of pancreas, especially in malignant cases (use papers such Pathol Res Pract. 2019 ;215(1):82-89. doi: 10.1016/j.prp.2018.10.019), to increase the scientific value of the paper, I suggest to add to the immunoprofile HER-2 antibody.
