#### **SPECIFIC COMMENTS TO AUTHORS**

the paper: Lumbar Disc Rehydration in the Bridged Segment using BioFlex Dynamic Stabilization System: A case report and review of the literature is well written. There is risk of bias by industry influence and that may need to be more clear by the authors as there is a specific company name and manufacturer. The case is not enough evidence, that need to be clear in abstract and title and discussion that there maybe improved hydration of the disc with this procedure, but there is no enough evidence.
