SPECIFIC COMMENTS TO AUTHORS

In this study, the authors presented two cases with postpartum pubic symphysis diastasis with review of the literature. Some problems existed.

ANSWERS TO THE REVIEWER

1. **Conclusion in the abstract:** The conclusion should be one or two sentences directly relevant to the major findings of your study. It should be directly relevant to the difficulties, management, incidence or something related to the pubic symphysis diastasis. The current conclusion is no good.

The conclusion was changed in line with your valuable recommendations.

2. **Key words:** Delete "case report". Add "Pregnancy, Vaginal delivery" as additional

two key words.

“Case report” deleted, “Pregnancy, Vaginal delivery” added.

3. Core tip: Delete the middle two sentences of describing the two cases. Just describe significance related to your major findings.

Deleted. The significance of our findings was clarified.

4. Language: The language needs to be improved because of some grammar mistakes.

The language was reviewed repeatedly taking into account the observations.

5. What does “para” mean?

P para (number of births of viable offspring), G gravida (number of pregnancies)
