In this study, the authors presented two cases with postpartum pubic symphysis diastasis with review of the literature. Some problems existed. 1. Conclusion in the abstract: The conclusion should be one or two sentences directly relevant to the major findings of your study. It should be directly relevant to the difficulties, management, incidence or something related to the pubic symphysis diastasis. The current conclusion is no good. 2. Key words: Delete “case report”. Add “Pregnancy, Vaginal delivery” as additional two key words. 3. Core tip: Delete the middle two sentences of describing the two cases. Just describe significance related to your major findings. 4. Language: The language needs to be improved because of some grammar mistakes. 5. What does “para” mean?
