## [PDF] Diarrheal Diseases - DCP3

<https://dcp-3.org/sites/default/files/dcp2/DCP19.pdf>

Diarrheal diseases remain a leading cause of preventable death, especially among children under five in developing countries. This chapter reviews and prioritizes a number of available interventions. The normal intestinal tract regulates the absorption and secretion of electrolytes and water to meet the body's

**Pathogens causing diarrhoea among Bangladeshi children with malignancy:  
Results from two pilot studies**

Sabina Karim, Ferdousi Begum, Afiquil Islam, Monowar Ahmad Tarafdar, Mamtaz Begum, Md Johirul Islam, Bushra Malik, Md Shamim Ahsan, Ameneh Khatami, Harunor Rashid

**Abstract**

**BACKGROUND**

Diarrhoea is a frequent symptom among children with cancer, and occurs due to a composite effect of underlying disease and immunosuppression consequent to therapy, malnutrition and non-infective aetiologies such as mucositis. In a large proportion of cases, the aetiology of diarrhoea remains unknown but often multiple pathogens, including parasites, are attributed.

## Prevention of diarrhoea in young children in developing ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2486931>

Abstract. An updated review of nonvaccine interventions for the prevention of childhood diarrhoea in developing countries is presented. The importance of various key preventive strategies (breast-feeding, water supply and sanitation improvements) is confirmed and certain aspects of others (promotion of personal and domestic hygiene, weaning education/food hygiene) are refined.
