## Behavioral symptoms in breast cancer patients and ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3057774>

Feb 10, 2008 · Behavioral therapies have demonstrated efficacy in the treatment of insomnia, including insomnia secondary to medical conditions, supporting their use among breast cancer patients. Positive effects of cognitive-behavioral therapy (CBT) and other behavioral treatments have been demonstrated in several meta-analyses 92, 93, including one focusing on middle-aged and older adults 94, who represent the majority of breast cancer patients.

One-hundred and twenty-four patients with metastatic breast cancer were randomised to either a group Cognitive Behaviour Therapy (CBT) intervention, or to a no-therapy control group condition.

## Cognitive Impairment in Adults with Non ... - cancer.gov

<https://www.cancer.gov/about-cancer/treatment/side-effects/memory/cognitive-impairment...> ▼

Twenty-seven studies of subjective cognitive impairment in patients with breast cancer published between 1960 and April 2009 were identified by one group of researchers.[3] Only eight studies were high quality. The percentage of patients reporting subjective concerns ranged from 21% to 90%.

## Behavioral Intervention for Cancer Treatment Side Effects ...

<https://academic.oup.com/jnci/article/93/11/810/2906144> ▼

Jun 06, 2001 · One of the most promising approaches to effective management is nonpharmacologic intervention based on behavioral research and theory. The purpose of this review is to examine the effectiveness of behavioral intervention methods in the control of aversive side effects of cancer treatments.
