This is an interesting case report on hydroxyurea-induced cutaneous squamous cell carcinoma and literature review. The following points are suggested for further consideration. 1. Please add the text "Figure 3" in the paragraph of FINAL DIAGNOSIS, for the sentence: i.e. "Based on histopathological examination, the patient was diagnosed with cSCC (Figure 3)." 2. Please add the brief microscopic description for the final diagnosis as well as for the figure legend for figure 3.

The authors described an interesting case of SCC associated with long-term use of hydroxyurea. Major changes are needed in its different aspects before publication.
Abstract: -Delete the word “maintenance” in the background -Description of the hand lesions in case summary is not correct -Most the wounds: add “of” after most
Introduction: -Delete “and antiviral” Case presentation: -Decrease the number of subtitles -Appendectomy was done 10 years ago, not previously -Figures 1, 2: wrong description, please rewrite. Note that the ulcer is vegetating -Please mention the details of the histopathological findings in both text and figure 3 Discussion: -Please shorten the discussion section and delete the second paragraph
