

ANSWERING REVIEWERS

October 14, 2013

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 5158-review.doc).

Title: Overexpression of kallikrein gene 10(KLK10) is a biomarker of predicting poor prognosis in gastric cancer

Author: Xin Jiao, Hong-Jun Lu, Mi-Mi Zhai, Zhi-Jun Tan, Hai-Ning Zhi, Xiao-Man Liu, Chen-Hao Liu, Da-Peng Zhang

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 5158

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) In 2006, Feng et al. has reported the expression and clinicopathological factors of KLK10 in gastric cancer patients (J Gastroenterol Hepatol, 2006, 21: 1596-603).But they did not demonstrate the relationship between KLK10 and prognosis.Because further follow-up study is none.

(2) In this study,the number of specimens is limited, large sample capacity study is needed in the following work.

(3) Figures and tables have been correctly placed and clearly indicated.

(4) Thanks for your precious suggestion,we will continue to do much work to prove my conclusion.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

焦鑫
