1. Please correlate the data from Figure 2 with the title of the paper and with your conclusions; 2. In conclusion: please cut the term "future reasearch". Please present the current deficiencies related to this therapy. And let others judge from current deficiencies, which will be future research into this therapy.

Authors interestingly focus attention on a new paradigm on therapeutic approach to PDAC concluding that there is a strong need of patient research centered approach. The opinion review is well written and the topic is well defined. I suggest to improve the manuscript with a table that summarize the evidences from published studies on this topic, that, as reported in figure 2, are in strong grow.
