### **Assessment methods and services for older people with cancer in the United Kingdom**

Tania Kalsi, Danielle Harari

National cancer strategy calls for comprehensive assessments for older people but current practice across the United Kingdom is not well described.

#### AIM

To identify current assessment methods and access to relevant supporting services for older people with cancer.

#### METHODS

A web-based survey (SurveyMonkey) targeting health professionals (oncologists, cancer surgeons, geriatricians, nurses and allied health professionals) was distributed January - April 2016 *via* United Kingdom nationally recognised professional societies. Responses were analysed in frequencies and percentages. Chi Square was used to compare differences in responses between different groups.
