Imaging findings of inflammatory pseudotumor-like follicular dendritic cell tumor of liver: Two case reports and review of literature

Abstract

BACKGROUND

Inflammatory pseudotumor-like follicular dendritic cell (IPT-like FDC) tumor of the liver is an uncommon tumor with extremely low incidence. To date, the radiologic findings of this tumor in multiphase computed tomography (CT) and magnetic resonance imaging (MRI) imaging have not been described.

CASE SUMMARY

Patient 1 is a 31-year-old Chinese female, presented a complaining with the incidentally finding of the multiple liver masses. In local hospital, an abdominal enhanced CT found two hypo-density solid lesions, with heterogeneous sustained

Splenic Inflammatory Pseudotumor-Like Follicular Dendritic ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4107821>

In situ hybridization analysis for Epstein-Barr virus (EBV) revealed that most of the spindle cells were positive for EBV, and immunohistochemistry showed the expression of the follicular dendritic cell markers CD21, CD35 and CD23 within the tumor. The diagnosis of inflammatory pseudotumor-like follicular dendritic cell tumor was established.

Inflammatory pseudotumor-like follicular dendritic cell tumor (IPT-like FDCT) is a rare, distinctive histological subtype of this low-grade malignant neoplasm, with consistent Epstein-Barr virus (EBV) association. It pre-sents similar morphology and displays clinical and pathological characteristics intermediate between inflam-matory pseudotumor (IPT) and follicular dendritic cell (FDC) tumor.

Inflammatory pseudotumor-like follicular dendritic cell ...

<https://appliedcr.biomedcentral.com/articles/10.1186/s41241-017-0051-7>

Dec 28, 2017 - Follicular dendritic cell (FDC) tumor is an uncommon neoplasm. It generally presents as a slow-growing, painless mass, without systemic symptoms. Histological features usually include low grade spindle cell proliferation. This tumor occurs primarily in lymph nodes, especially cervical and axillary, however, involvement of extranodal sites such as the tonsils, spleen, liver, and ...

Sep 28, 2010 - Fifteen cases of inflammatory pseudotumor-like follicular dendritic cell tumor of the liver including the case we describe here have been reported in the literature. A review of the literature disclosed that normal follicular dendritic cells may express ER; however, extensive testing has not been previously reported in follicular dendritic cell sarcoma.
