Optimal timing of preoperative indocyanine green ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6099380>

In the current study, intraoperative ICG fluorescent **cholangiography** was performed to increase visibility of the bile ducts during **laparoscopic** cholecystectomy. We investigated the optimum timing of ICG administration for strong **fluorescence** intensity of the **biliary** tract and weak **fluorescence** ...
