SPECIFIC COMMENTS TO AUTHORS

This is an interesting report of two cases. However this situation has implication not only on endoscopy but for any medical procedure or consultation or any other activity such as driving which can be affected by cognitive impairment. This point should be mentioned in the discussion. The paper is too long. The detailed description of patient evaluation and management does not add too much to the message the author wants to convey. The length of case description needs to be reduced.

SPECIFIC COMMENTS TO AUTHORS

This is a well written report of two cases of bizarre behaviour of Gastroenterologists during performing endoscopies. This novel toxic encephalopathy due to various reasons is a very rare phenomenon which requires urgent recognition and treatment action. Both incidents were promptly recognised and dealt with in the most appropriate manner. Patients were not harmed and doctors were treated promptly and appropriately.
