**Thrombocytopenia with Multiple Splenic Lesions - histiocytic sarcoma of the spleen without splenomegaly: A case report**

Huang K *et al.* Histiolytic sarcoma of the spleen without splenomegaly

Kai Huang, Alvaro Frometa Columbie, Robert W Allan, Subhasis Misra

## Abstract

### BACKGROUND

Histiocytic sarcoma (HS) of the spleen is reported to be a rare and lethal disease. The clinicopathological features of splenic HS have not been well described. The objective of this paper is to describe the diagnosis and treatment of a case of this rare disease and provide a review of the literature.

### CASE SUMMARY

In this article, we discuss a case of a 40-year-old Hispanic female presented with progressive thrombocytopenia and multiple hypoechoic lesions in the spleen without splenomegaly. A positron emission tomography-computed tomography showed increased activity in cervical lymph nodes, as well as multiple bone and splenic lesions
