

PEER-REVIEW REPORT

Name of journal: World Journal of Experimental Medicine

Manuscript NO: 52180

Title: Neutron-activated biodegradable (153SmAcAc)-poly-(L-lactic acid) microspheres for intraarterial radioembolization of hepatic tumors

Reviewer's code: 02527808

Position: Editor-in-Chief

Academic degree: MD

Professional title: Professor

Reviewer's country: Egypt

Author's country: Malaysia

Manuscript submission date: 2019-10-20

Reviewer chosen by: Ying Dou

Reviewer accepted review: 2019-12-13 03:49

Reviewer performed review: 2019-12-15 01:25

Review time: 1 Day and 21 Hours

SPECIFIC COMMENTS TO AUTHORS

The article is novel and very important as there is unmet need to develop new methods and techniques to overcome liver tumors but there are some comments - The introduction is very long, actually no need of details of methodology as this must be placed in patients and methods section, also the comparison between techniques must be in the discussion As regard patients and methods:where the number of patients , how can you diagnose the hepatocellular carcinoma , what are the inclusion and exclusion criteria, - The results:where the demographic data of the patients, some tables without statistical analysis -Discussion: the discussion is very long, there are repetition of the results in the discussion -many many paragraphs without any references

SPECIFIC COMMENTS TO AUTHORS

this study is an interesting one, but some comments are highlighted below: 1- the conclusion section is long. 2-this topic is discussed before as regards HCC, so what is the new with this research. 3- grammar and style need polishing
