**Total endovascular repair of an intraoperative stent-graft deployed in the false lumen of Stanford type A aortic dissection: A case report**

Xu-Ran Li, Yuan-Hao Tong, Xiao-Qiang Li, Chang-Jian Liu, Chen Liu, Zhao Liu

### Abstract

#### BACKGROUND

A 46-year-old male underwent ascending aortic replacement, total arch replacement and descending aortic stent implantation for Stanford type A aortic dissection in 2016. However, an intraoperative stent-graft was deployed in the false lumen inadvertently. This caused severe iatrogenic thoracic and abdominal aortic dissection (TAAD) and the

## Thoracic endovascular repair for acute type A aortic ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4973122>

There are few reports in the medical literature of successful treatment of acute **type A aortic dissection** utilizing **endovascular** techniques. The first reported **case** of **endovascular** treatment of **type A aortic dissection** was by Dorros and colleagues in 2000 utilizing a trans-septal technique . A guide wire was passed from the right femoral vein ...

## Total arch repair for acute type A aortic dissection with ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4445643>

Background. In **total arch repair** with open placement of a triple-branched stent graft for acute **type A aortic dissection**, the diameters of the native arch vessels and the distances between 2 neighboring arch vessels did not always match the available sizes of the triple-branched stent grafts, and insertion of ed stent graft through the distal ascending **aortic** incision was not ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6716760>

Retrograde **type A aortic dissection** (RTAD) is a severe complication of thoracic **endovascular aortic repair** (TEVAR). In this regard, we present our unique surgical methods for **total arch and descending aorta replacement** for RTAD after TEVAR for complicated **type B aortic dissection** (TBAD).
