[Troponin elevation in acute ischemic stroke \(TRELAS ...](#)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3166899>

Aug 08, 2011 - One possible explanation in some patients may be the coincidence of acute coronary **syndrome** (ACS) leading to ischemic **myocardial** necrosis. This notion is supported by the fact that stroke and **myocardial infarction** share common risk factors and by the high prevalence of coronary artery disease (CAD) in stroke patients [13].

[Stroke–heart syndrome: clinical presentation and ...](#)

<https://www.researchgate.net/publication/328546388...>

None of the patients with TGA with hs-cTn elevation in our cohort presented **clinical symptoms** or **ECG alterations suggestive of myocardial infarction**, making **ischaemic myocardial injury** very unlikely.

[An emergency medicine approach to troponin elevation due ...](#)

<https://www.sciencedirect.com/science/article/pii/S0735675719308058>

The 4th **universal definition of myocardial infarction**, published in August 2018, **defines myocardial injury** as an **elevation of troponin** above the 99th percentile upper reference limit, with an **acute injury** present if there is a rise and/or **fall of troponin values** .
