Mortality in adult-onset and elderly-onset IBD: a ...

<https://www.ncbi.nlm.nih.gov/pubmed/31092591>

May 15, 2019 · Relative mortality during the first 5 years of follow-up decreased significantly over time. Incident cases of 2002-2014 had 2.3 years shorter mean estimated life span than matched comparators. CONCLUSIONS: Adult-onset and **elderly-onset** patients with UC, **Crohn's disease** and IBD-unclassified were all at increased **risk** of death.

Mild clinical behaviour of Crohn disease in elderly ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4699598>

Apr 06, 2015 · Elderly patients with **Crohn disease** had a **mild clinical course** characterized by the **lack** of escalation to immunosuppressive and **anti-tumour necrosis factor therapy**, as well as **long-term remission**.

Association Between Early-life Factors and Risk of Child ...

<https://academic.oup.com/ibdjournal/article/15/6/858/4647632> ▾

Dec 23, 2008 · A birth **cohort study** involving all live births in the source population was used to assess temporal **trends** and the association between birth order, month of birth, and other perinatal **factors** and CD. From 1983 to 1998 live births in Victoria, 278 developed pediatric onset CD by age 16 and were successfully linked to the Perinatal Morbidity ...

Trends and risk factors of mortality analysis in patients ...

<https://translational-medicine.biomedcentral.com/articles/10.1186/s12967-019-02164-3> ▼

Dec 12, 2019 · Inflammatory bowel disease (IBD) was emerging as a worldwide epidemic disease, and the advanced therapy changed the clinical course and possibly the outcomes. Our previous study reported a higher mortality rate from (IBD) in Taiwan than in Western countries. We proposed to analyze the trend and risk factors of mortality in order to improve the care quality of IBD patients.
