

PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 52464

Title: Spontaneous regression of stage III neuroblastoma: A case report

Reviewer's code: 02445717

Position: Editorial Board

Academic degree: MD, PhD

Professional title: Doctor

Reviewer's country: Spain

Author's country: China

Reviewer chosen by: Jin-Lei Wang

Reviewer accepted review: 2019-11-22 09:46

Reviewer performed review: 2019-11-26 07:08

Review time: 3 Days and 21 Hours

report of this case increases the knowledge of the stage III spontaneous regression of neuroblastoma. However there is an issue and suggestion It has been reported that expression of TrkA in neuroblastoma is associated with favorable clinical and biological features and these patients have an excellent outcome. Indeed, neuroblastomas expressing TrkA are prone to spontaneous regression or differentiation (Genet Mol Res. 2015;14:13195-202; Cell Tissue Res. 2018;372:277-286). Based on the above features would be interesting to determine the expression of TrkA in the tumor biopsy. Moreover, the results should be discussed.
