Nuclear stress testing in elderly patients: a review of ...

<https://www.ncbi.nlm.nih.gov/pubmed/17571912>

MPI may utilise exercise treadmill or **pharmacological stress testing**. While MPI has been evaluated in a wide **variety of patient subpopulations**, there are very limited data on its prognostic value in the **elderly population**, particularly those >75 years of age, who are making up an ever increasing proportion of the **patient population**.

Overuse of Preoperative Cardiac Stress Testing in Medicare ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3521863>

Of the **patients** with no cardiac indications for preoperative **stress testing**, 3.75% (N= 2,803) received **stress testing** in the 2 months before surgery. The rate of preoperative **stress testing** increased from 1.72% in 1996 to 6.44% in 2007 (p<0.0001).
