

## PEER-REVIEW REPORT

**Name of journal:** World Journal of Clinical Cases

**Manuscript NO:** 52614

**Title:** Rapid Remission of Refractory SAPHO Syndrome in Response to the JAK Inhibitor Tofacitinib: a Case Report

**Reviewer's code:** 03726743

**Position:** Editorial Board

**Academic degree:** FACP, MD, PhD

**Professional title:** Associate Professor, Director

**Reviewer's Country/Territory:** United States

**Author's Country/Territory:** China

**Manuscript submission date:** 2020-05-14

**Reviewer chosen by:** AI Technique

**Reviewer accepted review:** 2020-05-14 13:34

**Reviewer performed review:** 2020-05-14 19:17

**Review time:** 5 Hours

#### **SPECIFIC COMMENTS TO AUTHORS**

Very interesting case report submission. I have some comments to help enhance it: In the phrase "Her symptoms were unresponsiveness...", change word to "unresponsive" -In the "Physical examination" section, objective findings should be reported, not what the patient reports. So for example, would change "The patient reported swelling", state whether or not there was swelling. -Less at the beginning of a sentence, the words "Serum" and "Leflunomide" need not be capitalized. -There should be more discussion of how JAK fits into the pathogenesis of SAPHO. In addition, this case report would be strengthened by adding a schematic diagram of cell signaling in SAPHO syndrome and aware JAK inhibitors may fit in.
