Awareness and recall during general anesthesia

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4041951>

May 26, 2014 · **Anesthesia awareness** is defined as both consciousness and recall of surgical events. New research has been conducted out to test this phenomenon. However, testing methods have not proven reliable, including those using devices based on electroencephalographic techniques to detect and prevent intraoperative awareness.
