Dear Editor,

We are pleased to resubmit to you the manuscript entitled '*Awareness during emergence from anesthesia. Features and future research directions*'.

We reviewed the manuscript taking into account the very helpful changes suggested by the reviewer and hope you will accept the revised version of the paper.

Detailed point by point response to the reviewer's comments.

*Reviewer. Table 1. Please mention the reference/s pertaining to data within the legend of the table.*

Response. The reference has been added in the table 1

*Reviewer. "In a recent study, the authors found that approximately 80% of these complications occurred in patients not managed by neuromuscular monitoring [13]." Reference is dated 2015 (not recent).*

Response. The whole sentence has been revised as suggested. "In a study conducted on the topic, the authors found that approximately 80% of these complications occurred in patients not managed by neuromuscular monitoring"

Best Regards,

The authors
