

Dear editors and reviewers:

On behalf of our co-authors, we would like to express our great appreciation to you, editors and reviewer very much for your positive and constructive comments and suggestions to our manuscript 52699 entitled "Metabolic and Genetic Assessments Interpret an Unexplained Aggressive Pulmonary Hypertension Induce by Methylmalonic Acidemia".

We have studied reviewer's comments carefully. Those comments are all valuable and very helpful for revising and strengthening our manuscript, as well as the important guiding significance to our further researches. In accordance with the comments, we have revised the manuscript. Please refer to the revised manuscript for the specific changes. On the following pages, please find our point-by-point answers to your questions or comments.

Reviewer1:

In the case report entitled "Metabolic and genetic assessments interpret an unexplained aggressive pulmonary hypertension induce by methylmalonic acidemia", the authors reported an uncommon case who presented as severe pulmonary hypertension as the first manifestation without significant cardiovascular malformation, and finally diagnosed as methylmalonic aciduria after metabolic and genomic assessment. The observation is insightful, and could be helpful in clinic study.

1. Full name with its abbreviation (such as CT, MRI, ET-1...etc) should be firstly appeared in the paper.

**Reply:** Thanks for your kind mention, and we have revised all the abbreviations. Thanks.

2. The paper presents some typing errors and an extensive editing of English language is recommended.

**Reply:** We are sorry for the English writing, and we have sent it for English editing again.

Reviewer2:

Thanks for all your help and review for this article, and appreciate for your comments on this work.
