

PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 52767

Title: Late-onset multiple acyl-CoA dehydrogenase deficiency with cardiac syncope: A case report

Reviewer’s code: 03722832

Position: Editorial Board

Academic degree: DNB, MD

Professional title: Associate Professor

Reviewer’s country: India

Author’s country: China

Manuscript submission date: 2019-11-26

Reviewer chosen by: Jin-Lei Wang

Reviewer accepted review: 2019-12-15 04:22

Reviewer performed review: 2019-12-15 04:55

Review time: 1 Hour

SPECIFIC COMMENTS TO AUTHORS

The authors reported a case of late-onset of multiple acyl-CoA dehydrogenase deficiency with cardiac syncope. This case seems to be interesting, however, there are several problems to be solved. #1 In general, paroxysmal supraventricular tachycardia (PSVT) occurs from the main cause of atrioventricular reentrant tachycardia or atrioventricular node reentrant tachycardia. These abnormalities may be congenital. Thus, if PSVT is present in the present patient, the accompanied PSVT may not be a origin of multiple acyl-CoA dehydrogenase deficiency. The authors should comment on this. #2 The authors should provide when the tilting test was performed. Did the authors perform this examination before treatment? #3 The authors should show the vital data including blood pressure at admission and during PSVT. When PSVT occurred, what was the patient position? When the patient was on the supine, did she lost her consciousness?
