Publish Year: 2018

2018-6-7 · Cases of diverticula of the buccal mucosa are extremely rare. Literature searches of databases such as PubMed/MEDLINE for this condition have revealed only 10 case reports. In this case report, we describe our experience in the management of this rare condition and review the previous 10 previously reported cases. A 66-year-old man presented with a pouch containing inspissated food ...

Diverticula of the buccal mucosa are very uncommon. The first **report** of a **diverticulum** in the **buccal mucosa** was described by Bailey [2] as a **case** of a voluminous **diverticulum** arising from the **buccal sulcus** and extending into the neck. Since then, only nine **cases** have been **reported** in the literature [3, 4, 5, 6, 7, 8, 9].
