SPECIFIC COMMENTS TO AUTHORS

The manuscript written by Suttorp M. et al. describes the achievements and future directions of The International Registry on Pediatric CML (IR-PCML). Since pediatric CML is rare and it thus important to collect all data on the diagnosis, treatment, and prognosis for the future advances in the management of the disease. From that point of view, the role of IR-PCML would be very important, and the manuscript could provide valuable information to the various physicians.
