## Neutrophil-to-lymphocyte ratio is associated with survival ...

<https://onlinelibrary.wiley.com/doi/abs/10.1111/liv.14405>

**Lenvatinib**, a newly developed molecularly targeted agent, has become available for patients with unresectable hepatocellular carcinoma (HCC). Neutrophil-to-lymphocyte ratio (NLR) has been reported to be associated with poor outcomes in numerous malignancies.

**Author:** Toshifumi Tada, Takashi Kumada, At... **Publish Year:** 2020

**Neutrophil to lymphocyte ratio and albumin bilirubin grade in hepatocellular carcinoma: A systematic review**

Ayman Bannaga, Ramesh P Arasaradnam

**Abstract**

**BACKGROUND**

Hepatocellular carcinoma (HCC) is a frequent cause of cancer related death globally. Neutrophil to lymphocyte ratio (NLR) and albumin bilirubin (ALBI) grade are emerging prognostic indicators in HCC.

**AIM**

To study published literature of NLR and ALBI over the last five years, and to
