well written manuscript. I have few suggestions. 1* how is the follow up of patient?
2-(<https://doi.org/10.1111/tbj.13174>) and (DOI: 10.21802/gmj.2019.2.11) I suggest these
uptodate related studies for the references.

The authors provide a case of secondary thyroid cancer due to breast cancer metastasis. The manuscript is well-written and delivers a clear message and given the high incidence of both cancers is worth publishing. I congratulate the authors on their efforts. One comment: the authors claim the diagnosis was based on the imaging and the past medical history. But malignancy is a histological diagnosis. The patient underwent thyroidectomy. Why did the authors not perform a biopsy? Please provide an adequate explanation.
