### *Observational Study*

**Feasibility of robotic assisted bladder sparing pelvic exenteration for locally advanced rectal cancer: A single institution case series**

Heah NH *et al.* Robotic pelvic exenteration in rectal cancers

Nathaniel H Heah, Kar Yong Wong

### **Abstract**

#### **BACKGROUND**

Pelvic exenteration for locally advanced rectal cancer involving prostate has been performed *via* open surgery. Robotic pelvic exenteration offers benefits of better pelvic visualisation and dissection for bladder preserving prostatectomy with vesicourethral anastomosis, while achieving clear margins.

## FIRST REPORT: ROBOTIC PELVIC EXENTERATION FOR LOCALLY ...

[https://www.researchgate.net/publication/259315601\\_First\\_report\\_Robotic\\_pelvic...](https://www.researchgate.net/publication/259315601_First_report_Robotic_pelvic...)

One of the first reports of **robotic pelvic exenteration for locally advanced rectal cancer** come from Shin et al. [44]. They described three cases including two extended resections with en bloc ...

## Robotic Anterior Pelvic Exenteration for Bladder Cancer in ...

<https://www.sciencedirect.com/science/article/pii/S0090429515011851>

**Robotic anterior pelvic exenteration** with intracorporeal urinary diversion for **bladder cancer** in patient with previous kidney-pancreas transplantation is a challenging but a feasible surgical technique that requires a multidisciplinary team and a low threshold to convert to open surgery.
