

## PEER-REVIEW REPORT

**Name of journal:** World Journal of Gastroenterology

**Manuscript NO:** 53401

**Title:** Lifestyle factors and long-term survival of gastric cancer patients: a large bidirectional cohort study from China

**Reviewer's code:** 03647716

**Position:** Editorial Board

**Academic degree:** MD, PhD

**Professional title:** Academic Research, Assistant Professor, Surgeon

**Reviewer's country:** Italy

**Author's country:** China

**Manuscript submission date:** 2019-12-19

**Reviewer chosen by:** AI Technique

**Reviewer accepted review:** 2019-12-20 21:30

**Reviewer performed review:** 2019-12-20 22:00

**Review time:** 1 Hour

#### **SPECIFIC COMMENTS TO AUTHORS**

1-“no surgery, gastrectomy, and only curative gastrectomy patients” : Should be explained as more detail. 2- Surgery treatment with D2 lymphadenectomy is cornerstone in potential curable T2-T4 or N+ patients with gastric cancer. Surgery treatment without D2 lymphadenectomy is accepted as only palliative treatment. Therefore; a: Total and subtotal gastrectomy subgroups should be added b: Subgroups including gastrectomy with D2 lymphadenectomy and gastrectomy without D2 lymphadenectomy should be added. 3-Which edition was used for TNM staging? 4- This study does not provide sufficient contribution for research progress in this field in the conclusion section although it includes a large number of patients.
