Case Control Study

Shared changes in angiogenic factors across gastrointestinal vascular conditions:

A pilot study

Douglas AR *et al.* Common angiogenic profile across distinct GI vascular disorders

Atiyekeogbebe R Douglas, Grainne Holleran, Sinead M Smith, Deirdre McNamara

Modulation of Circulating Angiogenic Factors and Tumor ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3800005>

Changes in plasma cytokines and angiogenic factors Of the 19 CAFs, significant temporal time × group interaction effects were observed for three CAFs. Specifically, a serial linear increase from baseline to week 12 was observed in the AC+AET group compared with serial linear decrease in the AC group for the proangiogenic factor placenta growth ...

Circulating Angiogenic Factors in Patients with ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3323572>

Apr 10, 2012 · Therefore, the aim of our study was to evaluate angiogenic processes and factors including circulating progenitor cells in TAO. Methodology/Principal Findings TAO patients with critical limb ischemia and age- and gender-matched nonsmokers and smokers without cardiovascular disease (n = 12 in each group) were enrolled in the study.

S.A. Karumanchi MD, in Biomarkers of Kidney Disease (Second Edition), 2017. Combination of Tests. Angiogenic factors, along with other modalities, may be combined for predicting preeclampsia. To identify patients at risk for severe and/or early onset preeclampsia, Espinoza et al. conducted a prospective study of 3296 women to determine the role of UADV, maternal plasma PIGF and sFlt-1 ...

Pilot Study of Angiogenic Response to Yttrium-90 ...

<https://www.sciencedirect.com/science/article/pii/S1051044313015522>

This prospective pilot study enrolled 22 patients with liver-dominant disease deriving from biopsy-proven hepatocellular carcinoma (HCC) (n = 7) or metastatic colorectal carcinoma (mCRC) (n = 15). Circulating angiogenic markers were measured from serum samples drawn at baseline and at time points after therapy ranging from 6 hours to 120 days.

[Angiogenic factors: potential to change clinical practice ...](#)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6175139>

Dec 28, 2017 · **Angiogenic factors** are currently used in clinical practice in Germany as an aid in diagnosis and have been approved in England as per the NICE guidance. NICE has now recommended the use of **angiogenic factors** (sFlt-1 and PIGF or PIGF alone, depending on the manufacturer) to rule out PE in women between 20 and 34 +6 weeks of pregnancy ...

[Pilot Evaluation of Angiogenesis Signaling Factor Response ...](#)

<https://pubs.rsna.org/doi/10.1148/radiol.2017162555>

Ten milliliters of peripheral venous blood in ethylenediaminetetraacetic acid were obtained immediately prior to the embolization procedure and 1 day, 2 weeks, and 5 weeks after the procedure. Plasma was isolated within 1 hour of blood collection and was stored at −80°C.
