## Nutrition management in acute pancreatitis

### Abstract

Acute pancreatitis (AP) is a common gastrointestinal disease and the leading cause of hospital admission and healthcare burden among gastrointestinal disorders in many countries. Patients can present with varying degrees of inflammation and disease severity, ranging from self-limiting mild AP to devastating and fatal severe AP. Many factors contribute to malnutrition in AP, especially abnormal metabolism

## Nutrition Management in Acute Pancreatitis

Author: Meera Ramanathan, Abdul Aziz Aadam Publish Year: 2019

Pancreatitis has consistently presented a therapeutic conundrum given the lack of medications found to be effective therapies. Management, thus, is focused on supportive interventions—most notably, aggressive hydration. Immediate and aggressive fluid resuscitative efforts assist in minimizing the untoward effects of hypovolemia in
