

PEER-REVIEW REPORT

Name of journal: World Journal of Gastroenterology

Manuscript NO: 53676

Title: Importance of genetic polymorphisms in liver transplantation outcomes

Reviewer's code: 02731621

Position: Peer Reviewer

Academic degree: FEBS, MD

Professional title: Associate Professor

Reviewer's country: Turkey

Author's country: Croatia

Manuscript submission date: 2019-12-31

Reviewer chosen by: Ruo-Yu Ma

Reviewer accepted review: 2020-01-18 08:40

Reviewer performed review: 2020-01-22 10:19

Review time: 4 Days and 1 Hour

This topic is new in liver transplantation for clinicians. But this personalized approach is promising for better outcomes. This review is a comprehensive summary of genetic polymorphisms. So this SNPs can be beneficial for clinicians but it should be validated for their effects. In future, clinicians in centers, performed mostly live donor liver transplant, can use SNPs for live donor selection at elective situations.
