SPECIFIC COMMENTS TO AUTHORS

This is a quality review article, well organized and well written. I have no principal remarks. I think, when you write about the works of other authors, it is not necessary to give their name and surname in full, it is enough to give only the surname. For example: "Taverna Simona et al.[28] showed..." will be presented as "Taverna et al.[28] showed...", or "In 2016, Bus Pauline et al.[65] performed..." will be written as "In 2016, Bus et al.[65] performed..." and so on. My second minor remark is regarding journal titles presentation in the Reference List. Please see Guidelines for Authors: "The journal title will be written in its abbreviated form (as shown in PubMed) in italics and followed by the article publication information...". Reference List should be constructed in strict accordance to the Guidelines.

SPECIFIC COMMENTS TO AUTHORS

A interesting review on the features and relationships of circulating exosomal miRNAs in BE/EAC, and the possible potential biomarkers may play a causative role in BE/EAC pathogenesis.
