

PEER-REVIEW REPORT

Name of journal: World Journal of Gastroenterology

Manuscript NO: 53732

Title: Long noncoding RNAs in gastric cancer: From molecular dissection to clinical application

Reviewer's code: 05038589

Position: Editorial Board

Academic degree: BPharm, MD, MSc, PhD

Professional title: Assistant Professor

Reviewer's Country/Territory: Egypt

Author's Country/Territory: China

Manuscript submission date: 2019-12-29

Reviewer chosen by: AI Technique

Reviewer accepted review: 2019-12-29 10:10

Reviewer performed review: 2020-01-20 11:23

Review time: 22 Days and 1 Hour

SPECIFIC COMMENTS TO AUTHORS

A table summarizing the roles of lncRNAs acting as miRNA sponge is needed Tables summarizing some of the lncRNAs mechanisms of action in GC is recommended

SPECIFIC COMMENTS TO AUTHORS

This manuscript requires extensive editing and re-writing by a proficient English speaker specialized in biomedical terminology. References need to be accurate and updated to the latest medical bibliography. Additionally, this paper demands organization of material and structure to present every entity of RNA's. Every RNA, SNPs, gene, e.t.c. should be cited accordingly when first presented in the text. Moreover, this paper requires at least 3 tables along with the figures that would promote the comprehension of mechanisms in the whole text. Figure 1 and its subcategories should be redesigned in coordination with the proposed tables because it is over-inclusive and confuses as it is. Perchance the authors should consider to perform a systematic review if they have the required materials in order to draw safer conclusions.
