

PEER-REVIEW REPORT

Name of journal: World Journal of Gastrointestinal Pathophysiology

Manuscript NO: 53850

Title: Selective granulocyte and monocyte apheresis in inflammatory bowel disease: Its past, present and future

Reviewer's code: 01221849

Position: Peer Reviewer

Academic degree: MD, PhD

Professional title: Associate Professor

Reviewer's Country/Territory: Japan

Author's Country/Territory: China

Manuscript submission date: 2019-12-31

Reviewer chosen by: Ruo-Yu Ma

Reviewer accepted review: 2020-01-05 06:26

Reviewer performed review: 2020-01-09 15:57

Review time: 4 Days and 9 Hours

SPECIFIC COMMENTS TO AUTHORS

I think that this review is interesting. But, I would like to suggest that you need to revise this one in part according to the following comment. Minor point. 1. Tanida et al previously reported that combination therapy of intensive GMA with biologics including adalimumab and ustekinumab appeared to be effective and safe for refractory UC or CD (J Clin Med Res. 2015 Nov;7(11):884-9 and Ther Apher Dial. 2018 Jun;22(3):295-300). These reports can be cited to improve and strengthen the discussion.

SPECIFIC COMMENTS TO AUTHORS

The title, summary and keywords reflect the work done. The manuscript is concise and well organized. This review addresses an important topic, but it should include two aspects: first, about the insertion of GMA in the treatment of IBD, considering the increasing use of biological and immunosuppressants, in the present and future status. The other important aspect to discuss is the cost-effectiveness of GMA in IBD. In the item “GMA for special IBD patients “ the authors must consider the inclusion of the article: Motoya, S., Tanaka, H., Shibuya, T. et al. Safety and effectiveness of granulocyte and monocyte adsorptive apheresis in patients with inflammatory bowel disease in special situations: a multicentre cohort study. BMC Gastroenterol 19, 196 (2019) doi:10.1186/s12876-019-1110-1
