## SPECIFIC COMMENTS TO AUTHORS

Hong et al. reported a review of the macrophage regulation of GVHD after stem cell transplantation. The topic might be interesting, although the context is more textbook rather than a review of the research. The presentation of the review needs to revise a lot. First, the table 1 is inappropriate. It needs to rearrange all to show what you want to point out. Second, there is no figure at all. Illustration or scheme of each section, such as functions of macrophage in immune response, infiltration of macrophage contributes to GVHD, macrophage polarization in GVHD, recruitment of macrophages, macrophages-related cytokines in GVHD, interaction between macrophages and T cells, macrophages attribute to fibrosis in chronic GVHD, will give great help readers to understand.
