

Reviewer# 02542970

This paper make a reviewed for neuroendocrine tumors in the aspect of diagnosis , endoscopic ultrasound, serology of biomarkers, imaging studies and functional somatostatin scans. it would bring new information in this area.

Reviewer# 00004403

The review is well done and the list of references is adequate. This reviewer suggests the author to add some flow charts reporting the current diagnostic and therapeutic algorithms of the most frequent neuroendocrine tumors in order to render reading of the paper more appealing. There are some spelling errors throughout the text.

Reviewer# 03769117

The article has a disorganized structure and requires several tables and further explains

Answers to reviewers:

1. Tables have been added.
2. The manuscript has been thoroughly revised to improve language quality.
