SPECIFIC COMMENTS TO AUTHORS

The author presents us a comprehensive review of a new mechanism of regulating specific macrophage functions during repair. It is a topic of interest to the researchers in the related areas. I have some suggestions the authors might want to consider: 1. Some figures are recommended to illustrate the mechanism of regulation specific macrophage functions during repair. 2. The author highlights the function and role of hepatic macrophage in repair, I recommend the author can describe this process with different sub-headin. 3. Some references are out of date. I would suggest the author can update some references.
