

INFORMED CONSENT STATEMENT

Name of Journal: World Journal of Gastroenterology

Manuscript NO: 54031

Manuscript Type: Observational Study

Non-alcoholic steatohepatitis and the risk of myocardial infarction: A population-based national study

Informed consent statement: Patients were not required to give informed consent to the study because the analysis used de-identified data from a database that were obtained after each patient agreed to be evaluated by written consent.

Sincerely,

A blacked-out signature, likely of Sara Ghoneim, which has been redacted with heavy black ink.

Sara Ghoneim
